DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08 September 2005 has been entered.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. Claims 7-22 and 24-27 are allowed.

Independent claims 7, 11, 17 and 27 have been amended to include limitations directed towards "conversion parameters associated with the first/second communication protocol." These parameters are generally depicted as element 218 of the applicant's figure 6.

Claim 7 recites, "configuring the signal path...includes programming the control circuit according to conversion parameters associated with the identified second communication protocol;" claim 11 recites, "dynamically programming a control circuit...according to conversion parameters associated with the identified second communication protocol;" claim 17 recites, "conversion parameters which are used to dynamically program a first control circuit;" and claim 27 recites, "dynamically

Art Unit: 2646

programming a control circuit according to conversion parameters." In this way, all independent claims use the above-mentioned conversion parameters in an analogous manner, namely for use in programming a control circuit. Contrary to the recited subject matter of claims 7, 11, 17 and 27, Deutsch discloses programming a switch matrix 43, which corresponds to the "control circuit" recited, according to whether ISDN-T, ISDN-U or POTS signals are present on lines 52-1 through 52-8. These steps at least correspond to the claimed steps and means for determining a communication protocol used by a telephone switching system and programming a control circuit according to the determined communication protocol. However, the programming step is merely based on the network type and does not rely on separately accessible conversion parameters as recited. Thus, claims 7, 11, 17 and 27 are allowable over Deutsch in view of Ryu.

Dependent claims 8-10, 12-16, 18-22 and 24-26 further limit independent claims 7, 11, 17 and 27, and thus, are allowable for at least the same reasons as their respective parent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 2646

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter F. Briney III whose telephone number is 571-272-7513. The examiner can normally be reached on M-F 8am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sinh Tran can be reached on 571-272-7564. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
